

Presenter	Poster #	Abstract Title
Adhikari, Tika	P101	<i>Effects of ASD on soil bacterial communities and black root rot disease in strawberry</i>
Aguirre, Valerin	P102	<i>Diversity and functional potential of rhizospheric microorganisms in traditional Theobroma cacao L. cropping systems of northern Huila, Colombia</i>
Bakker, Matthew	P103	<i>Supporting productive and sustainable crop production via the Canadian Collection of Agricultural Soil Microbes</i>
Batchelder, Catherine	P104	<i>Fungicidal and Biological Seed Treatment Effects on Soybean Microbiomes</i>
Bilz, Lisa Carolin	P105	<i>Natural soil microbiomes as a resource for improving nitrogen-use efficiency in wheat</i>
Bernal Giraldo, Adriana	P106	<i>Dual biostimulant and biocontrol potential of Lactic Acid Bacteria strains A9 and A40 against Fusarium wilt in Cape gooseberry: Growth, disease progress and molecular responses</i>
Boussif--Forêt, Hicham	P107	<i>Persistence of microbial functional genes associated with soil health, induced by microbial inoculation : Comparison between organically and intensively managed soils</i>
Chapin, Laura	P108	<i>Responses to CEA cultural practices are accompanied by plant-specific shifts in the rhizosphere bacterial community composition</i>
Chai, Yen Ning	P109	<i>Unraveling sorghum-microbiome interactions via root exudation across contrasting field environments</i>
Choi, Jeongyun	P110	<i>Host Genetic Background Shapes Rice Leaf Microbiome Responses to Loss of SWEET13-mediated Susceptibility</i>
Cohen, Jake	P111	<i>Microbial inoculants demonstrate density-dependent establishment success and marginal community impacts in wild soils</i>
Ellis, Martel	P112	<i>Genetic Architecture, Environment, and Time Structure Aboveground Trait Variation in Eastern Gamagrass</i>
Farhan, Sarah	P113	<i>Coalescing native microbiomes to enhance hydrocarbon biodegradation in diesel-contaminated High Arctic soils</i>
Floc'h, Jean-Baptiste	P114	<i>Environmental filtering, host selection, and anthropogenic disturbance jointly shape rhizosphere fungal communities across boreal forests</i>
Fong, Shirley	P115	<i>Effects of Pristine and Environmental-Mimic Nanoplastics on Growth and Biofilm Development of Pseudomonas defensor</i>
Gallagher, Dusti	P116	<i>The U.S. Culture Collection Network – A Central Resource for Microbe Culture Collections and Their Users</i>
Frank, Hannah	P117	<i>Predicting arbuscular mycorrhizal fungi in grapevines in the Finger Lakes</i>
Giebler, Mitchell	P118	<i>Tracking spatiotemporal dynamics of Pantoea ananatis lineages within the rice phytobiome</i>
Gonzalez, Jacqueline	P119	<i>Multi-Omics Characterization of a Commercial Biological Soil Amendment Uncovers Core Consortia and Functional Stability Across Production Batches</i>
Hallaf, Katel	P120	<i>Native soil microbiome impacts bacterial inoculant establishment</i>

Hernandez Perez, Elizabeth	P121	<i>From community composition to function: discovering multifunctional bacteria in the maize phytobiome</i>
Holman, Darin	P122	<i>Deciphering bacterial functional responses to metal stress through EMS mutagenesis: implications for plant-microbe interactions</i>
Hornick-Martyk, Hayden	P123	<i>Sweet corn (Zea mays L. convar. saccharata var. rugosa)-associated microbiome responses to artificial drought in a long-term cover crop experiment</i>
James, Vincent	P124	<i>Agricultural management practices differentially impact bacterial and fungal communities</i>
Jeong, Wonjae	P125	<i>Explainable machine learning for identifying high-risk areas and quantifying risk factors of fire blight in South Korea</i>
Kang, Chaeyun	P126	<i>Beyond ACC deaminase: downstream ACC metabolism contributes to bacterial ACC utilization and plant growth promotion</i>
Keyster, Marshall	P127	<i>Bacillus firmus CP5 confers antimony stress tolerance in Brassica napus</i>
Kundas, Valentyna	P128	<i>Environmental and Host-Mediated Selection of Alfalfa Rhizosphere Microbiomes Across Successive Microbial Generations Under Drought</i>
Kuzmanovic, Nemanja	P129	<i>From pathobiome insights to biological control: a crown gall case study</i>
Kuzmanovic, Nemanja	P130	<i>Diversity, host range, and comparative genomics of bacteriophages targeting Erwinia amylovora from agricultural environments</i>
Lee, Boyoung	P131	<i>Liverwort rhizoid-associated bacteria enhance plant drought tolerance in Arabidopsis thaliana</i>
Lee, Noh-Hyn	P132	<i>The flowering wheat head mycobiome integrates environmental history and modulates subsequent Fusarium head blight</i>
Liscombe, David	P133	<i>The Chemical Language of the Phytobiome: Using Metabolomics to Improve Pest and Disease Management</i>
Little, Zoe	P134	<i>Plant-associated microbiomes as an extension of resilient host physiology: drought-tolerant phenotypes associated with patterns of deterministic microbiome assembly across peanut genotypes Alabama</i>
Machado, Tulio	P135	<i>Development and Validation of a Reproducible Synthetic Soil-Plant System for Controlled Plant-Microbe Studies</i>
Mangla, Hrithik	P136	<i>Transcriptome Profiling of Epichloë coenophiala Stress Responses and Inter-kingdom Co-Expression with Tall Fescue (Lolium arundinaceum)</i>
Marbello Santrich, Angie	P137	<i>Leaves are a Battlefield: the phyllosphere microbiota as a dynamic fourth vertex in late blight disease</i>
Mayer, Evan	P138	<i>Long-term cover cropping can increase microbial plant growth promotion potential in rhizosphere soils of subsequent cash crops</i>
Medina Lopez, Melanie	P139	<i>Pectobacterium parmentieri and Verticillium dahliae alter the functional genetic profile of the potato microbiome</i>
McMillan, Hannah	P140	<i>Microbiota alter plant leaf epidermal properties at elevated temperature</i>
Mendoza Beltran, Mariana	P141	<i>Divergent soil acidification mechanisms and microbiome responses associated with a local bioferment in Sacha Inchi (Caquetá, Colombia)</i>

Mendoza Beltran, Mariana	P142	<i>Evaluation of the Rhizosphere Microbiome, Growth, and Yield of Sacha Inchi (Plukenetia volubilis) under Biofertilizer Application: A Field Trial in Florencia, Caquetá, Colombia</i>
Mitchell, Amanda	P143	<i>Rhizosphere microbiome recruitment in field-grown winter wheat under sustainable nitrogen fertilization strategies</i>
Njuguna, Diana	P144	<i>Temporal dynamics of host genotypic effects on rhizosphere bacterial community structure during anthesis in dryland wheat in western Nebraska</i>
